Meetings

Undergraduate presenters at the 2015 APS March Meeting.

Meetings are the lifeblood of SPS, and there are many opportunities to participate at the local, regional, national and even international levels. Most SPS Zones hold one or more Zone Meetings each academic year. In addition, SPS partners with many professional societies to host undergraduate research sessions at regional and national meetings across the United States.

SPS at Professional Society Meetings

SPS sessions at professional society meetings, help getting to meetings, and professional development resources.

SPS Zone Meetings

Find upcoming zone meetings, highlights from recent meetings, and help for meeting hosts.

2016 Quadrennial Physics Congress

Join SPS and Sigma Pi Sigma for the largest gathering of physics undergrads in history!
