ARE WE ALONE IN THE UNIVERSE?

CAN WE “SEE IN THE DARK”
THROUGH OBSTRUCTIONS TO ENSURE

NATIONAL SECURITY?

HOW DOES THE HUMAN BRAIN DEVELOP?

RIT West Networking Event

January 31, 2017

6:30—8:30 p.m.

Hotel Whitcomb

1231 Market Street

San Francisco, CA 94103

You are invited to a special networking event with faculty from the **College of Science, Engineering and Color Science**. Join your fellow colleagues that are attending the **SPIE West** and **IS&T Conferences** along with our San Francisco chapter members.

Dr. Don Figer, Director of the RIT Future Photon Initiative and Center for Detectors, will give a short presentation on the future of photonics and how it plays a role in answering the questions that intrigue us.
